DESCRIPTION

Enhance your flexo printing operations with our advanced cushion-based Biesse plate mounting tapes. Engineered for precision, these Biesse tapes feature a high-resilience foam available in multiple compressibilities to deliver exceptional print quality, even during high-speed and long-run processes. Ideal for labels, flexible packaging, and pre-print cardboard applications, they ensure robust adhesion and effortless, residue-free removal, optimizing your production workflow.

APPLICATION

- **Labels:** Ensures precise alignment and high-quality print outcomes for all types of labels.
- **Flexible Packaging:** Provides strong adhesion and clean removal, ideal for the dynamic needs of flexible packaging.
- **Pre-Print Cardboard:** Optimizes print quality and efficiency in pre-print processes for cardboard.
- **High-Speed Printing:** Designed to maintain performance and quality during extended, high-speed print runs.

USER GUIDANCE

- **Prepare surfaces thoroughly:** Clean plates and cylinders to ensure optimal adhesion.
- **Choose correct compressibility:** Select tape that matches your print job needs for best results.
- **Apply evenly:** Prevent wrinkles and air bubbles by carefully applying tape uniformly.
- **Remove with care:** After printing, gently remove tape to preserve plates and avoid residue.
